

MYCAR OWNER'S CARD

Telematics Communicator

START

This button will send a START command to your previously installed remote starter. The vehicles engine will start and run for the preset time. The timer will begin to count down from the preset runtime set by your installer.

STOP

This button will send a STOP command to your vehicles remote starter. The vehicle's engine will shut down and the runtime status will change to 00:00:00 once the action has been completed.

LOCK

This button will LOCK and/or ARM your vehicle. Your vehicle MUST be equipped with a power door lock system for this feature to work. The door lock status will change once this action is completed.

UNLOCK

This button will UNLOCK and/or DISARM your vehicle. Your vehicle MUST be equipped with a power door locking system for this feature to work. The door unlock status will change once this action is completed.

This icon will display if MyCar is connected to the network (GREEN) or not (GREY).

This icon will display the vehicle's battery level.

This button will allow you to see your current vehicle location.

This button will allow you to access the AUXILIARY functions. Some of the functions could be Motorized Lift Gate, Trunk Release, Power Sliding Doors, Rear Defrost, ETC. See your retailer for more details.

For more detailed instructions, please consult the HELP section of the MyCar App.
